

REGAL LOGISTICS®

From Port to Sale™

OUR MISSION

With nearly five decades' experience as a premier, asset-based third party logistics provider (3PL), Regal Logistics delivers innovative shipping solutions, state-of-the-art systems, lower costs and better results. We offer comprehensive services from port to end consumption point for North American companies importing from Asia, and specialize in weekly replenishment services and distribution to all major retailers, e-tailers and specialty stores using advanced information technologies to exceed retailers' standards, support various product lines and accelerate consumer goods to market via multiple port gateways in Seattle, Los Angeles and Charleston. Regal cultivates business relationships in which we collaborate to develop specific industry solutions capable of streamlining customers' logistics processes and improving product flow to help them achieve a competitive edge. Regal Logistics' full service integration model enables it to meet all its customers' needs and maintain complete control of the supply chain, from Port to Sale, with 2.4 million square feet of high velocity Distribution Center, real time inventory management and shipment tracking, transportation, import deconsolidation, cross docking, value added, reverse logistics and product recall services. Regal's superior staff, proprietary systems and organic growth drive its proven 3PL services, which are created and perfected by logistics professionals specifically for the supply chain management needs of manufacturers and importers. ***Regal Logistics is committed to achieving measurable results with service excellence, integrity and pride in our work.*** If there's a more efficient, cost-effective way to move product through the supply chain, we'll find it, improve on it and offer it to our customers.
